Additional Comments

Description

especially liked

- Great professor, Really made me think in depth for my answers!
- I have really enjoyed taking this class. Dr. Brown is a great teacher and I like the way he presents the lecture and discussion questions. He is very good at returning grades on time. He is also very good at explaining assignments and giving direction. Love this class. Would definitely recommend to anyone who needs to take a sociology class. Excellent professor.
- I really enjoyed this class. The content was thought provoking and especially enjoyed the different age groups and perspectives of the class as a whole.
- The most thing I liked about this class is the Professor Samuel Brown itself. He has a great heart for his students, he gave us a good time range to do our homeworks and research paper. His one of a kind Professor I ever have here in NCC. He is effective professor for this class. Thank you Professor Brown and Happy Holiday!
- This was my first time taking an online course and I can say that Mr. Brown does a great job.
- Your great the questions really make you think about self in connection to the material

suggest improvements

- He is effective Professor for this on-line Sociology class. I highly recommended him to my fellow classmates and friends who need to take Sociology. Thank you Professor I enjoyed and I have learned very much about your class. No suggestion for improvement because Professor Brown did a great job!!!
- Kepp doing you!
- None.
- Nothing, I think this course is great.
- Over all Professor Brown has taught a well rounded and nicely executed course. If I had to mention just one minor suggestion, perhaps some personal feedback to the student or group, especially if they have missed a core point or need to be redirected to specifics in a lesson or positives when objectives were exceptional. I think this would reinforce learning objectives were being met as well as add to the community experience. The blackboard system needs some tech. attention:) Best, Vickie
- Your great none
